

**Canyon Lake Release Advisory**

**January 29, 2019**

**3 p.m.**

The U.S. Army Corps of Engineers will begin reducing the water flow from Canyon Reservoir at 8 a.m. Wednesday, January 30. The process to close the gate will take approximately three hours.

GBRA will then take over the management of the water release and decrease the flow to 700 cubic feet per second (cfs).

Property owners, recreationalists and other stakeholders should take notice of the changing river flows. Additional information about Canyon releases and other stream flow data may be found at <https://bit.ly/2NI2HTz>.
